## ABOUT US

SUSTAINABLY MADE IN THE USA

Combining sustainability and regionally sourced materials has always been at the core of what we do and the products we make. Our manufacturing facility is located in Fort Mill, SC and every product is hand crafted by our incredible team.

## OUR PRODUCTS

Element Designs is the leading manufacturer of aluminum frame and glass cabinet doors in North America. We also offer custom shelving solutions, drawer fronts, magnetic markerboards, sliding door systems, dECOLuxe high gloss solid acrylic, dECOMatte thin surfaces and have an extensive backpainted glass program. Our name is synonymous with design innovation and modern function within the residential and commercial industries. With an unrivaled selection of styles, frames, finishes, inserts and more, our products have endless options that are tailored to each design and custom for every space. We have exceptional standards in both production and customer care and we look forward to creating custom pieces for you and your clients.

# SUSTAINABILITY

“ *We live on a planet that has a limited ecosystem and what we do has a large impact on our environment. This means that having a sustainable business is imperative to your survival as a company.* ”

*– Mike Uebersax,  
President & CEO of Element Designs*

When defining what it means to be sustainable; the material, product, and/or process must have not only a low impact on the environment itself but it must possess characteristics that by definition help prolong and sustain it's lifecycle.

At Element Designs, sustainability has always been at the core of what we do and the products we make. Some of the key materials we use, including aluminum and glass are naturally and inherently sustainable. Other materials like our dECOLuxe Solid Acrylic were sought out specifically because it is not only made from 100% recycled acrylic, but it is also 100% recyclable.

In addition to the materials we use, the way in which we manufacture our products has evolved to become much more sustainable and eco-conscious. This is something we continuously strive to work towards and as the available resources grow, they are giving us the ability to make a significant impact in the preservation of our planet. We will continue to innovate the ways in which we produce our products and hope you can join us on our mission to leave this world a better place than we found it.

## Aluminum

All aluminum products are manufactured using materials from regional suppliers in an effort to reduce our carbon footprint. Our aluminum products are exceptionally durable, have an extremely long lifespan and are virtually maintenance free.

Aluminum extrusion waste generated during manufacturing is taken to a local metal recycling facility here in Fort Mill, SC. Our aluminum materials and products are 100% recyclable.

We encourage the reusing and repurposing of all aluminum doors. This is easily done by replacing components within and around existing aluminum doors and frames.

## Glass

All of our glass material contains at least 20% post industrial recycled content. The architectural resin used for our 3Form® inserts also yields a high percentage of post industrial recycled material.

Unusable glass generated during manufacturing is reused in asphalt production. Our glass materials and products are 100% recyclable.

## Acrylic

Element Designs is the exclusive fabricator of dECOLuxe Solid Acrylic for North America. It is made of 100% recycled acrylic and is 100% recyclable, using PMMA (Polymethyl Methacrylate) which is the only plastic that can be recycled back to its original raw material: Monomer.

During manufacturing, dECOLuxe uses less water and generates less CO2 than standard cast acrylic sheets. It is also VOC (Volatile Organic Compound) and HFC (Hydrofluorocarbon) free.

## Facility

None of our products contain VOC's. Our backpainted glass process uses environmentally safe water based paint. Zero chemicals or toxins are released from our products, there is zero effect on indoor air quality.

We offer full-service reclamation on all of our products. Instead of discarding them or throwing them away, we encourage our customers to return products for complete and proper recycling at no charge.

Our packaging materials are regionally sourced. To protect our products in transit we use corrugated edge wrapping and honeycomb foam alternative, which are made from 100% recycled cardboard. For void fill we use biodegradable plastic air fill. Within our production space and company office we recycle all cans, glass, plastic bottles and paper products. We also actively promote the importance of environmental responsibility and are proud to sponsor a recycling center for our industrial park.

# ALUMINUM FRAME CABINET DOORS

Our custom created hand built aluminum frame cabinet doors are a modern addition to residential and commercial interiors. Whether kitchen cabinet doors, office furniture doors, bathroom drawer fronts, closet storage, or sliding door systems, our aluminum frames are made to our customer's specifications and include all functional and decorative hardware borings. Our aluminum frames come in an incredible variety of finishes, which provide endless design options when paired with our premium glass, mirror, and other custom insert options. With no minimum order quantities and quick lead times, our contemporary aluminum frame doors and drawer fronts are ideal for both remodeling and new construction projects. We offer traditional European hinges which are easily incorporated into any casework applications. We also offer integrated hinges which utilize specially engineered AIR technology to create a sleek look without any visible hardware.

Element Designs offers various options in both anodized and coated finishes that are available on any aluminum products.

Element Designs specialty coated finishes give you unrivaled design possibilities. The selections are timeless and trendsetting. They are available on almost all of our products from aluminum frame doors to decorative hardware, giving you the ability to create a perfectly coordinated interior space. All our coated paint finishes are water based with zero effect to indoor air quality. Our products are sustainably made in the USA. For more information on our sustainability initiatives, please visit us online at [element-designs.com](https://element-designs.com).

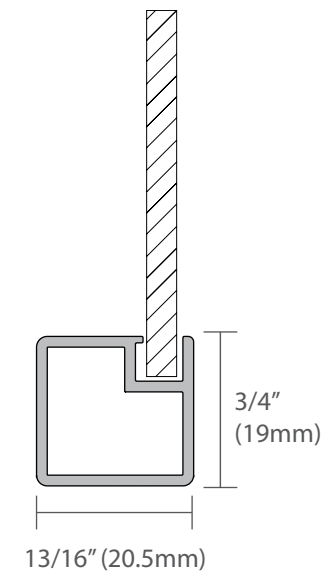

## COATED FINISHES

- Fingerprint & scratch resistant
- Sustainable water-based coating
- Consistent finish without orange peel effect
- Sustainably made in the USA

- All glass is tempered safety glass
- Glass without tempered logo is available upon request
- 189 non-standard and custom colors available
- High end furniture quality finish with complete opacity
- All backpainted glass comes with light grey protective painted backer

# RECYCLED LEATHER INSERTS

## RECYCLED LEATHER

Ecodomo® Recycled Leather is a universal surface material that can be integrated in lieu of wood veneer in any interior space. Recycled Leather Veneer is sustainable and resilient. The proprietary resin top coat delivers stain, wear, and water resistance. Suitable for horizontal and vertical applications,

3Form Sample Kit available in our online sample store.

## DESIGN GUIDELINES

- Inserts are 5/32" (4mm) thick
- Sandstone finish on front and back
- 3Form Architectural Resin inserts contain organic materials and may vary in color and density due to natural conditions
- Patterns no longer in our standard program, including ensign, fossil leaf, glint gold, kathali greys, mari seamless, starcrossed shadow, strand iron, struck pure, thatch, and weld silver are still available. Extended lead times may apply.
- Available as aluminum frame door inserts and cut-to-size panels.

# ELUSION GLASS INSERTS

## DESIGN GUIDELINES

- Opaque backpainted border around perimeter of glass
- Ideal for aluminum frame profiles AF006 and AF010
- Ideal for low-iron clear, low-iron satin, bronze clear, bronze satin, grey clear, and grey satin glass options
- Some glass options may affect border color, recommended to order sample
- Standard border width = 2 1/4" (57mm)
- Custom border sizes also available
- 10 standard and 189 non-standard colors
- Custom color matching available
- High end furniture quality paint finish with light grey protective painted backer border
- Matte side faces in when using satin glass unless otherwise specified
- Glass inserts are 5/32" (4mm) thick

# SLIDING DOOR SYSTEMS

Pictured: AF010 Profile in Chrome Finish with Mirror Inserts  
Image Courtesy of Wellborn Cabinet

Our sliding door systems are the perfect addition to closets, pantries, offices, cabinets and furniture designs. Sliding doors are custom manufactured to size (+/- 1mm) and arrive with hardware pre-installed (if applicable). Sliding door systems can be fully customized with your choice of aluminum frame profile, finish and insert options including glass, mirror, and dECOLuxe. These systems can also be built with divider rails to create a multiple pane appearance using the same insert type or you may combine different insert options for a truly custom design. No minimum order quantities, quick lead times. Sustainably made in the USA.

AF003 Natural Aluminum, Satin Glass, Divider Rails

# LARGE SLIDING DOORS

## DESIGN GUIDELINES

- Large Floor Sliding System, top guide and bottom track
- Floor-to-ceiling and inset casework applications
- Multiple planes of motion
- Inset or surface mount track
- Door weight capacity: 110 lbs
- Soft close mechanisms available
- Max door height 96"
- Contact Element Designs for dimensions exceeding these guidelines
- Compatible with all insert options

## AVAILABLE PROFILE OPTIONS:

Pictured: AF004 Profile in Natural Aluminum Finish with Low-Iron Satin Glass Inserts

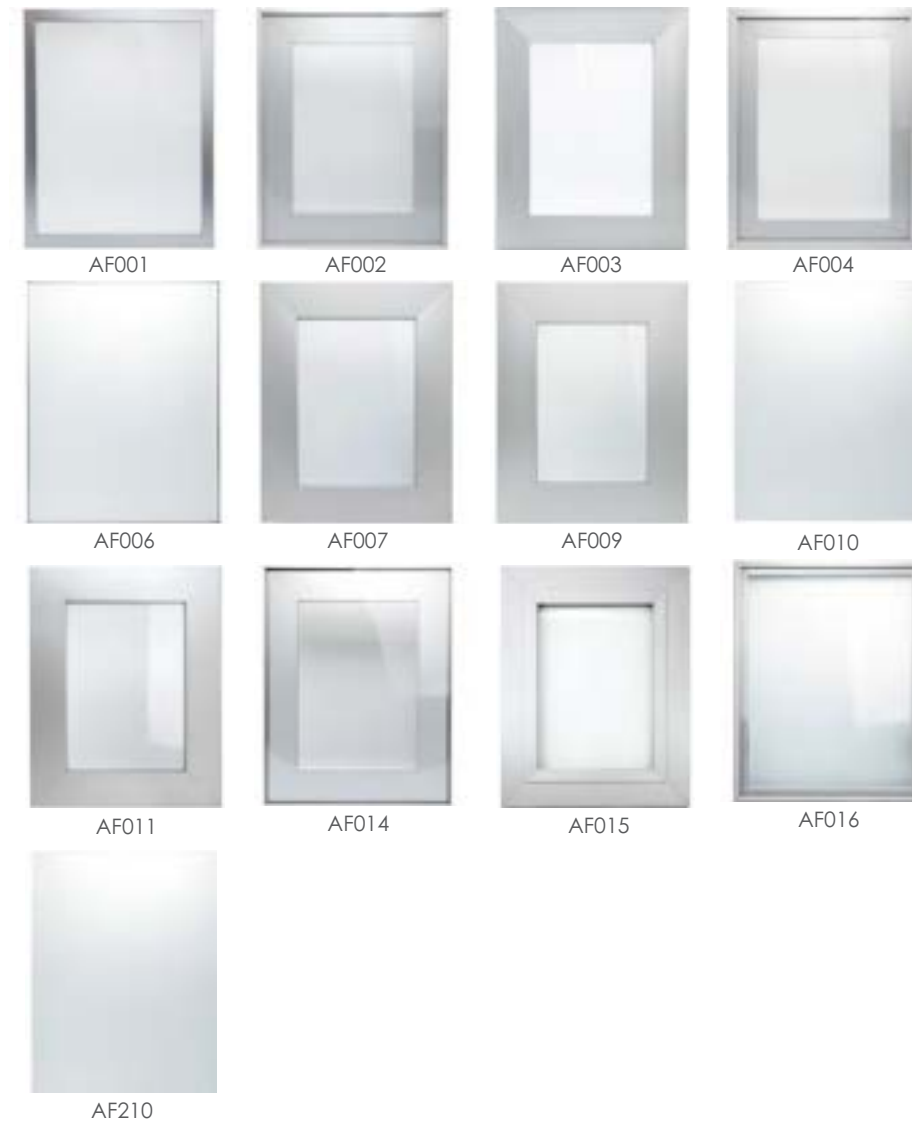

# SMALL SLIDING DOORS

## DESIGN GUIDELINES

- Small Sliding System, top and bottom track
- Single or by-pass sliding doors use surface mount or inset track.
- Door weight capacity: 66 lbs
- Max door height 77"
- Compatible with all insert options

## AVAILABLE PROFILE OPTIONS:

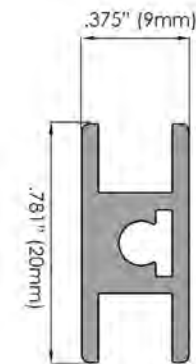

Pictured: AF004 Profile in Brushed Stainless Finish with Satin Glass Inserts

# DIVIDER RAILS

## DIVIDER RAILS- SLIDING DOORS

## DESIGN GUIDELINES

- Divider Rails can be used with sliding doors to provide additional design options.
- Rails can run either horizontally or vertically
- Multiple inserts may be used per door with divider rail
- Divider rails measure 25/32" (20mm) wide
- Contact Element Designs for panel height and width limitations with divider rails

# FRAMELESS GLASS DOORS

Image Courtesy of Phil Kean

## FRAMELESS GLASS DOORS

Frameless glass doors add modern transparent style to a variety of residential and commercial spaces. These doors are available in six glass options which seamlessly highlight retail spaces, office interiors, kitchens, closets, and more. They can be custom manufactured to accent any design, from traditional to contemporary. Frameless glass doors include pre-mounted glass door plates for CRISTALLO Hinges by Blum. Doors can be easily fabricated for use with your choice of decorative hardware.

## DESIGN GUIDELINES

- Maximum width & height = 84" (1219mm)
- Minimum width & height = 5.5" (102mm)
- Maximum square footage = 14 sf
- Thickness is 6mm (1/4")
- Glass is always flat edge polished
- NOT recommended as drawer fronts
- Standard glass options available include: low-iron clear, low-iron satin, clear, satin, grey clear, and bronze clear
- Contact Element Designs for dimensions exceeding recommended maximums

## HINGE TYPE - CRISTALLO with Blumotion

Element Designs is the EXCLUSIVE supplier of the Blum CRISTALLO Hinge in the United States.

# GOLA CHANNELS

Pictured: GOLA J-Channel & C-Channel in Gold  
Image Courtesy of Essence Cabinets

GOLA aluminum channels are a simple way to achieve hardware-free cabinetry not only with their sleek design, but without additional fabrication required during the manufacturing of both cabinet doors and drawer fronts. GOLA profiles are easily installed into cabinets with concealed brackets. The spacer channels provide ample room for fingertips so that the doors and drawer fronts themselves can be used to open and close instead of exposed handles and pulls.

Aluminum Spacer Single & Double, Stainless Nickel Finish

J-Channel & C-Channel, Stainless Nickel Finish

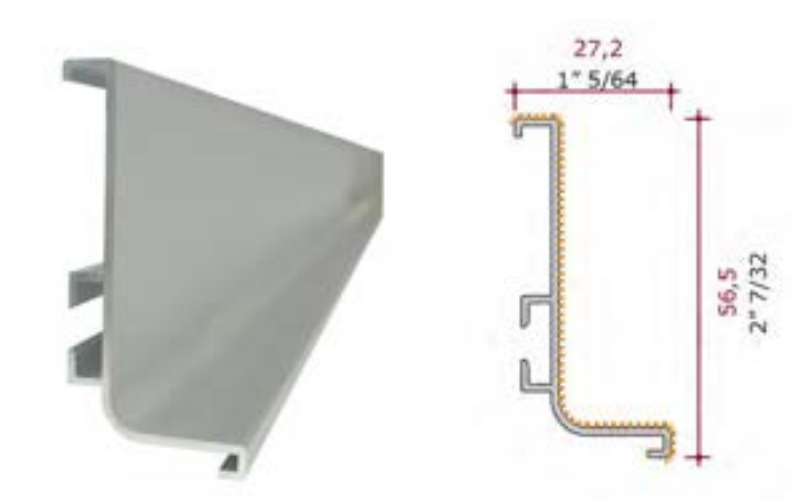

C-Channel, Gold Finish

J-CHANNEL

GOLA ALUMINUM J-CHANNEL (GC-8006)

Mounts inside of cabinet, under countertop to provide space for fingers to reach the back of cabinet door or drawer front.

DESIGN GUIDELINES

- Length options: 90" (2286), 120" (3048)
- Custom cut-to-size lengths available upon request
- For necessary mounting components, including open and closed end caps, see the GOLA technical manual which can be found on our website

# SHELVING SYSTEMS

Element Designs' shelving systems provide fully integrated and complete storage solutions for residential and commercial spaces. Our modern shelving designs combine contemporary style and exceptional materials into elegant easy-to-install units. Our °eCubed Shelving Systems can be built around existing wood shelving along with a variety of our glass shelving options, including standard, backpainted, custom color backpainted, °elusion and more.

°eCubed Shelving System, Onyx

°eCubed Shelving Ladder, Onyx

°eCubed Shelving System, Brushed Stainless

# °eCUBED SHELVING SYSTEMS

## DESIGN GUIDELINES

- Shelves can be inset to rest on the interior aluminum framing itself or they can lay on top of the aluminum framing covering the entire shelf depth
- Sizing requirements are based on each configuration
- Additional depth support required every 48"
- Shelf thickness of 6mm recommended when inset
- Standard glass options include: low-iron clear, low-iron satin, clear, satin, grey clear, and bronze clear
- °eCubed aluminum shelving frames are compatible with any existing or customer supplied shelf material (not supplied by Element Designs)
- Caps or leveling feet also available, specify when ordering
- Shelving units will ship fully or partially assembled
- Contact Element Designs for mounting recommendation

# °eCUBED SHELVING LADDER

The °eCubed shelving ladder is a series of aluminum framed wall brackets that are completely customizable to meet any specific size requirements. The ladder design creates a modern take on open shelving. Unlike traditional floating shelf products, the ecubed ladder has a higher weight capacity which accomodates more application needs. In addition to offering several glass shelving options, these are also compatible with existing or customer provided shelving including non-glass material.

## DESIGN GUIDELINES

- Unique ladder design allows shelves to sit across depth of wall bracket
- Ladders can be built to accomidate 2 - 8 shelves
- Compatible with any shelf material (not supplied by Element Designs)
- Easy to install
- Ships fully assembled, Installation hardware included
- Additional options include wood shelf mounting holes
- Sustainably made in the USA

## LADDER CONFIGURATIONS

- °eCubed Shelving Ladders are available in custom configurations with various widths, heights and depths
- Shelving configuration and individual ladder size will determine the number of wall brackets required to complete the shelving unit

[< back to table of contents](#)

## COMPATIBLE SHELVING

°eCubed shelving ladders can be used with a variety of shelving options. The aluminum frame brackets are incredibly strong and they have been designed to support shelving made from wood, stone, laminate, and glass.

# GLASS SHELVES

## GLASS SHELVES

Glass is an elegant and extremely durable shelving product that is ideal for any shelving application. As a versatile shelving material, glass is also available with aluminum frames to create a perfect shelving solution. All glass shelves are custom manufactured to size and can be mounted using standard shelf mounting methods. Our glass can be used with any of our shelving systems or it can be used with an existing customer application.

# BASE SYSTEMS

Element Designs' base systems are a sleek, modern and unique product solution for all types of cabinet and furniture designs. They are used primarily as a base for kitchen islands, bathroom vanities, cabinets, tables, desks, and also as standalone open shelving solution. Layouts include various standard configuration options. Custom configurations are also available.

Our aluminum frame base systems come in 30mm (1 3/16") and 50mm (2") width aluminum frame square tubing. They are available in all our anodized and coated finish options. Support solutions include leveling feet, casters, and end caps. Decorative cuff is also available for base systems designed with leveling feet or caps.

# GLASS MARKERBOARDS

Custom glass markerboards by Element Designs combine backpainted glass with a magnetic backer to create beautiful and functional work surfaces. Unlike other writable surfaces, glass is a durable surface which will not fade or ghost over time making it the premium markerboard product. Available in virtually any size and any color, our backpainted glass markerboards elevate any commercial or residential interior space.

## DESIGN GUIDELINES

- Custom manufactured to size (+/- 1mm)
- Maximum size is 48" x 120"
- Available in gloss or writable matte
- Magnetic or non-magnetic options available
- All edges will be flat edge polished
- Custom designs and logo printing available
- Custom colors require sample approval and fees may apply
- Wall mounting hardware (Z-Clip) is included, orientation must be specified
- Magnetic markerboards can be used with rare earth neodymium magnets only
- Magnetic markerboard accessory kits also available
- Magnetic glass can be used as an insert option on our aluminum frame cabinet doors
- QUICK SHIP PROGRAM AVAILABLE FOR STANDARD SIZES
