

Etched Glass

- Chemically etched glass with evenly “etched” surface
- Custom etched patterns or images using customer provided artwork and designs
- Ideal for signage and decorative surfaces
- Etching available on clear or backpainted glass
- Permanent etching will not wash or fade off
- Cost effective
- Fingerprint resistant unlike sandblasted glass
- No special sealant needed to protect etched surfaces
- Maintenance friendly - Easy clean up using standard glass cleaning supplies
- Tempered glass surfaces can be etched without damage or loss of glass strength
- Non-toxic and environmentally safe etching technology

Custom etched door insert on clear glass with negative etch pattern.

Custom etched glass by Element Designs adds interest to your designs by transforming ordinary clear or backpainted glass into extraordinary custom design surfaces. Our ability to etch clear or backpainted glass opens the door to a world of unique applications such as door inserts, wall panels, privacy panels, tabletops, signage and more. Element Designs can utilize most customer provided high resolution images in their proprietary etching process.

Element Designs utilizes an environmentally friendly etching process to produce custom etching with crisp, clear lines. Unlike sandblasting processes, the chemical etch does not fingerprint and is relatively low maintenance, especially when compared to alternative etched products.
