

How-To: Set Up Your Showroom Design Center Rotating Pedestal Display

Choose 28 of the 50+ 4"x4" glass inserts to display on the side of your showroom design center with the aluminum slide rails. These will hold the glass inserts at both the top and bottom.

Choose 12 of the 14 natural aluminum profile corner samples and all 12 of the aluminum finish samples to hang onto the side of your showroom design center using their pre-installed j-hangers..

There is a storage cabinet provided behind the first cabinet door on the pedestal display. Use this area to store any and all remaining samples, and printed catalogs.
